Introduction

This second Register of the American Milking Devon Cattle Association represents an effort begun by the Association in 1994 to meet its primary goal: to provide Milking Devon breeders and those interested in the breed with a means to track the ancestry of individual animals. With a relatively small population of cattle, it was felt that the Association had to ensure a means for owners to construct the pedigree of individual animals and to plan breeding programs to ensure the continued genetic diversity of the herd.

This Register is divided into three sections: cow registry, bull registry, and registry of Foundation animals. The first two sections represent all animals registered with the Association since its reformation in 1978.

The entries appear in the following format.

Registration number Name

Calved on Bred by

Sire name Sire registration number

Dam name Dam registration number

Transfer record

While every effort has been made to ensure the accuracy of this Register, current information was not available for all animals and owners. Users of this Register are requested to advise the Registrar in writing of any corrections or additions. It is our intention to update this document yearly, incorporating all such changes, as well as new animals registered during the year.
