## Introduction

This fifth volume of the American Milking Devon Cattle Association Herd Book represents an effort begun by the Association in 1994 to meet its primary goal: to provide Milking Devon breeders and those interested in the breed with a means to track the ancestry of individual animals. With a relatively small population of cattle, it was felt that the Association had to ensure a means for owners to construct the pedigree of individual animals and to plan breeding programs to ensure the continued genetic diversity of the herd.

Volume 5 of the Herd Book lists animals registered by the Association from January 2017 to December 2018. This register is divided into two sections: bull registry and cow registry. The entries appear in the following format.

Registration number

Name

Calved on

Sire name and Sire registration number

Dam name and Dam registration number

Bred by

While every effort has been made to ensure the accuracy of this Register, users are requested to advise the Registrar in writing of any corrections or additions.
