## Introduction

This fourth volume of the American Milking Devon Cattle Association Herd Book represents an effort begun by the Association in 1994 to meet its primary goal: to provide Milking Devon breeders and those interested in the breed with a means to track the ancestry of individual animals. With a relatively small population of cattle, it was felt that the Association had to ensure a means for owners to construct the pedigree of individual animals and to plan breeding programs to ensure the continued genetic diversity of the herd.

This Register is divided into three sections: cow registry, bull registry, and transfers of cows and bulls recorded in previous volumes. The first two sections represent all animals registered by the Association since May 1, 2014. Volume 2 of the Herd Book lists animals registered by the Association from its reformation in 1978 to the end of 2004. Volume 3 of the Herd Book lists animals registered by the Association from 2004 to 2014. The entries appear in the following format.

Registration number

Name

Calved on Bred by

Sire name Sire registration number

Dam name Dam registration number

Transfer record

While every effort has been made to ensure the accuracy of this Register, current information was not available for all animals and owners. Users of this Register are requested to advise the Registrar in writing of any corrections or additions.
